The UnChoice
64% felt pressured by others to abort. Her “choice” can include loss of home, income and family, or violence and even murder. Homicide is the leading killer of pregnant women. Her “choice” can be based on disinformation from credentialed experts, negligent counselors or even trusted pastors.

Intense pressure to abort can come from husbands, parents, doctors, partners, counselors, or close friends and family. They may threaten or blackmail a woman into abortion. These are not idle threats. Coercion can escalate to violence. Women who resist abortion have been beaten, tortured and killed. One husband jumped on his wife’s stomach to force an abortion. A mother forced her daughter at gunpoint to go to the abortion clinic. A woman was forcibly injected by the baby’s father with an abortifacient drug.

Unwanted Non-Choice ... Their Choice, Not Hers.
Reasons women give for having abortions:

- Forced by mother
- Father opposed
- Husband or boyfriend persuaded me
- No other option given
- Would have been kicked out
- Loss of family’s support
- Lack of support from society
- Clinic persuaded me
- In 95% of all cases, the male partner played a central role in the decision.
- 45% of men interviewed at abortion clinics recalled urging abortion, including 37% of married men.
- In the above study, men justified being the primary decision maker, regarding the abortion.
- 64% of women who aborted felt pressured by others.

Coerced Choice ... Taken to the Clinic to Make Sure She Keeps the Appointment
A former abortion clinic security guard testified before the Massachusetts legislature that the greatest threat to women at abortion clinics were the men who accompanied them. Many women are also pressured by clinic staff financially rewarded for selling abortions.

Forced Choice ... Threats Can Escalate to Violence or Murder — the Leading Killer of Pregnant Women
The pressure can escalate. Many pregnant women have been killed by partners trying to prevent the birth, and being pregnant places women at higher risk of being attacked. Murder is the leading cause of death among pregnant women. 92% of women surveyed list domestic violence and assault as the women’s issue that is of highest concern to them.

Uninformed Non-Choice ... “When I learned the truth, I can’t tell you how betrayed I felt.”

- 54% were unsure of their decision, yet 67% received no counseling beforehand.
- 84% received inadequate counseling beforehand. 79% were not told about alternatives.
- Many were misinformed by experts about fetal development, abortion alternatives or risks.
- Many were denied essential personal, family, societal or economic support.

Unsafe Choice ... American Voters Concerned About Coercion and Risks; Support Research and Screening.
Nearly half of voters believe coerced abortion is common. They’ll support candidates who advocate legislation holding abortionists liable for failing to screen for evidence of coercion. Nearly 80% of abortions take place in non-hospital facilities, ill-equipped for emergency care. Americans are kept in the dark about unwanted abortions, risks and risk factors.

Trauma. Injury. Grief. Death from All Causes. 6 Times Higher Suicide.

- 31% had health complications afterwards.
- 65% higher risk of clinical depression.
- 3.5x higher risk of death from all causes.
- 65% suffer multiple symptoms of post-traumatic stress disorder.
- 10% have immediate complications, some are life-threatening.
- Suicide rates 6 times higher if women abort vs. giving birth.
